

The Ultimate Green Team.

Introducing the best value and best performance in laundry today. Milnor's 60 lb. capacity 30022 V8Z washer-extractor and M76ED dryer were built to work together efficiently. The washer consistently reaches a 300 G extraction speed (*when prompted*) saving valuable time in the dryer. Both machines share a small footprint, Milnor's quality construction and exacting standards. They also meet all USDA guidelines and specifications for laundry equipment for dairy farms. And now, with the ingenious MilTouch™ Control, it's not only the best value in laundry today. It is also the smartest choice for your dairy farm.

Contact an authorized Milnor distributor or call 504-712-7656 to find out more.
